Chapter 1

# About the Unified Client for Lexmark

The Kofax Unified Client for Lexmark adds print and capture capabilities to Lexmark devices through AutoStore, Equitrac, and Output Manager while still using device-specific features.

Specific hardware and software compatibility requirements are outlined in this document. You must meet these requirements to support the Unified Client for Lexmark. These requirements specifically list the needs of the Unified Client for Lexmark and do not include any additional requirements for other components you might use in your system.

Chapter 2

# Product requirements

## Product components

| Specification | Description |
|---|---|
| Supported devices | The Unified Client will function with the Lexmark MFP and SFP devices that support the eSF 6.2 framework with screen sizes of small, wide, and extra-large screens.
